Invitation

The most important challenges facing humanity are to reduce disease occurrences and to improve human health. Translational research aims to transform the basic research knowledge and discoveries to sustainable human well-being. Previous years have yielded many basic discoveries and therefore, the potential for science to improve human life is enormous. In order to share national thoughts and experiences on these issues, a national seminar is proposed to be organized on the following themes:

1. Immunodiagnostics and immunotherapy
2. Biomedical sciences and therapeutics
3. Microbial Biotechnology and Bioremediation
4. Plant Biotechnology
5. Animal Biotechnology
